PRICING IS BASED ON THE TOTAL CELL COUNT - DEFAULT PITCH RATES INCREASE WITH PLATO

The size of the yeast pitch is custom tailored to provide the optimal cell count for your beer. Pricing is calculated using the pitch rates described below. Please contact us if you would prefer a different pitch rate.

For ales (with the exception of Vermont) we use a pitch rate of 750,000 cells/mL/°P for beers under 18°P, 1,250,000 cells/mL/°P for 18-20°P, and 1,500,000 cells/mL/°P for 21°P and above. For Vermont we use a pitch rate of 1,000,000 cells/mL/°P for beers under 18°P, 1,700,000 cells/mL/°P for 18-20°P, and 2,000,000 cells/mL/°P for 21°P and above.

Pitch yeast directly into the fermentor at recommended temps. As a best practice, please store the yeast in refrigerated conditions upon arrival.
